WORK EXPERIENCE

NOAH Business Applications   *5th Floor West Wing, OPPEN Building Makati City*
UIUX Designer/ Front-end Developer   *Mar 2020 - July 2024*

- Designed contemporary icons and seamlessly incorporated them into my projects.
- Craft custom flat icons specifically designed for web applications and dashboards.
- Developed and maintained UI components and libraries to optimize system functionality.
- Secured responsive designs across various screens and devices, enhancing overall user experience. Implemented interactive elements, animations, and transitions for heightened user engagement.
- Translated design mockups into clean, semantic HTML, CSS, and Javascript/Jquery code for visually appealing and responsive web applications.
- Documented new UI components/libraries and provided development guidelines.
- Execute basic SEO tactics to boost your website's discoverability on search engines.
- Developed a UI presentation for meetings to visually showcase the design concept.
- Directed feature development for the company website and web application, resulting in heightened performance and an enhanced user experience.
- Utilized Figma, Adobe Illustrator, and design software to create wireframes, prototypes, and mockups, effectively communicating design concepts and user flows.
- Performed testing across various browsers and devices to ensure responsive design functionality on all platforms.

USource Digital   *MVL Centre, Lipa, Batangas, Philippines*
Web Developer   *Mar 2018 - Aug 2019*

- Developed and managed websites using HTML, CSS, JavaScript, and various web development technologies.
- Ensured responsive and optimized websites for diverse devices, screen sizes, and browsers.
- Build a website utilizing both WordPress and Shopify platforms.
- Conducted extensive testing across browsers and devices to guarantee consistent functionality and appearance.

- Facilitated effective communication with clients, team members, and stakeholders, gathering requirements and delivering progress updates.
- Maintained comprehensive documentation for websites, including code comments, user guides, and technical manuals.
- Schedule a meeting to update the client on the project's progress and present the advancements made on the website.

Global Strategic Solution and Services   *San Miguel Avenue, Pasig City, Metro Manila*
Technical Specialist   *Jul 2016 - Aug 2017*

- Installed and updated systems on client servers to ensure optimal functionality.
- Identify opportunities for system and process improvements and implement solutions to enhance efficiency and performance.
- Conducted training sessions and created materials to educate team members and end-users on system usage and best practices.
- Identified opportunities for system and process improvements, implementing solutions to enhance efficiency and performance.
- Maintained accurate documentation of system configurations, processes, and policies to facilitate troubleshooting and knowledge sharing.

EDUCATION

AMA Computer College   *Q2FW+WW5, National Road, Batangas, 4200 Batangas*
Bachelor of Science in Information Technology (BSIT)   *Graduation Date: Jul 2016*
